

Transforming P2P

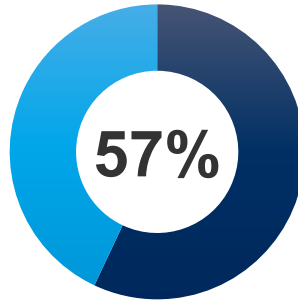

The Future of Procurement and Payment

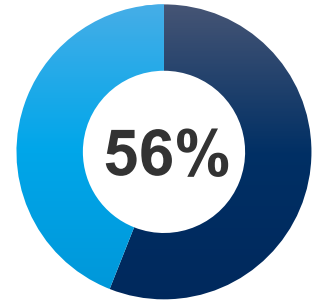

Trends that will shape P2P over the next five years

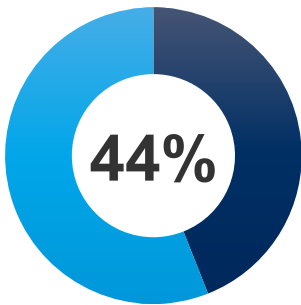

Artificial intelligence and Gen AI

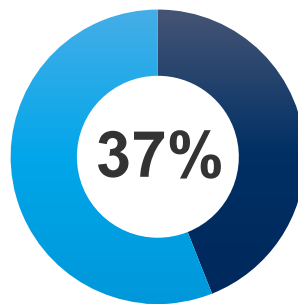

Digitalization of P2P process

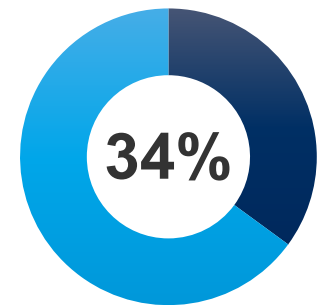

Deep real-time data and insights visibility

Broadening the scope of the S2P/P2P responsibility

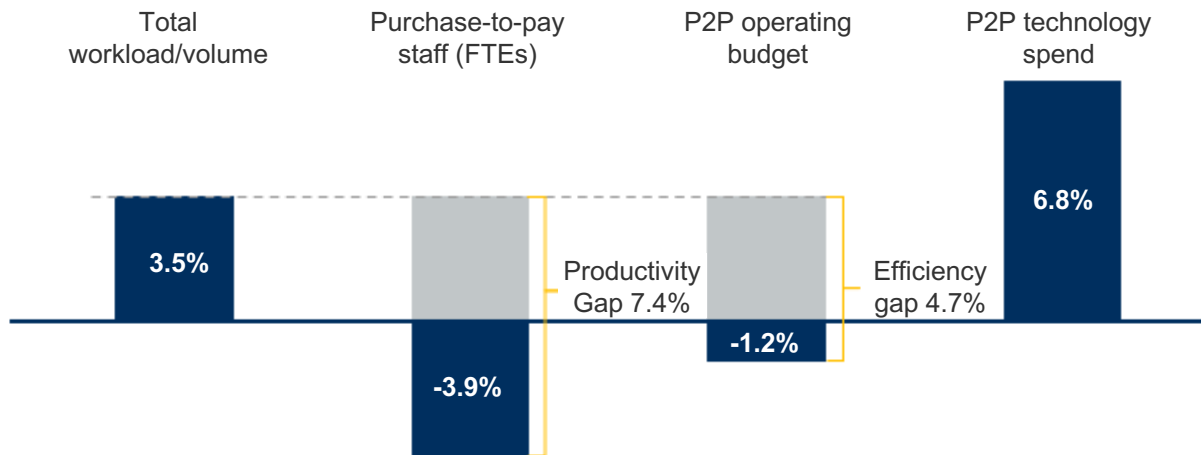

Prioritizing internal customer and supplier experience

Use of advanced analytics

Projected percent change from 2024 to 2025 for purchase-to-pay workload, staffing, budget and technology spend

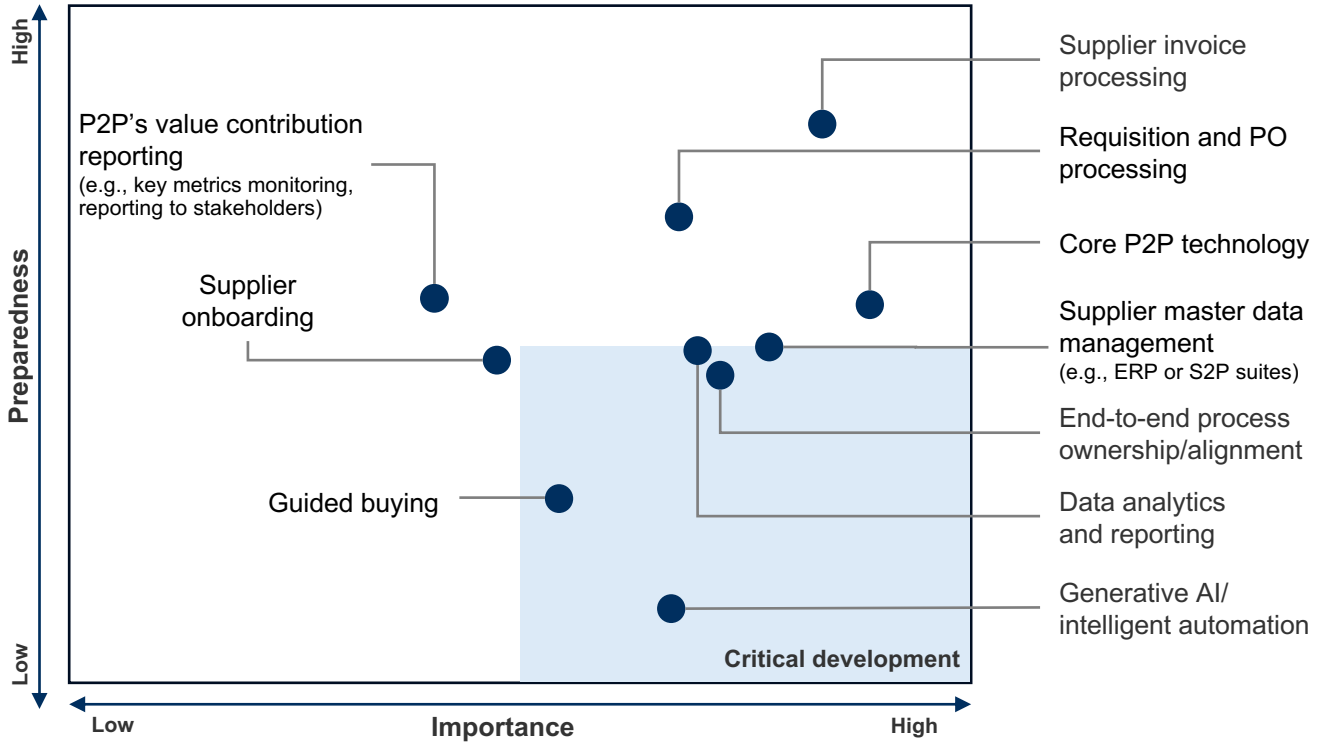

Source: The Hackett Group 2025 Purchase-to-Pay Agenda and Key Issues Study

Purchase-to-pay's workload is predicted to increase by 3.5% in 2025, but with a reduction in both headcount and operating budget.

Purchase-to-pay improvement initiatives for 2025

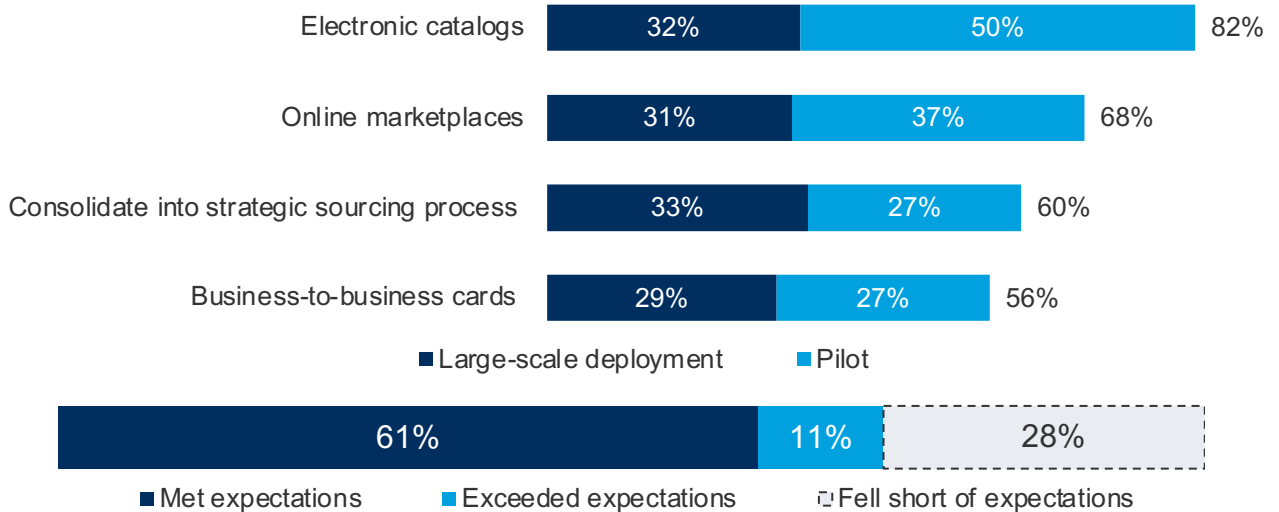

To close productivity and efficiency gaps, organizations are seeking initiatives that are critical to their overall processes, such as Gen AI/intelligent automation, end-to-end process ownership, supplier master data management, data analytics and guided buying.

Tail spend management adoption and business objective realization

By leveraging advanced tail spend management tools, organizations can unlock hidden savings and drive significant cost efficiencies, transforming low-value transactions into strategic opportunities.
